The Sierra Club, founded in 1892 by John Muir, has devoted itself to the study and protection of the earth's scenic and ecological resources—mountains, wetlands, woodlands, wild shores and rivers, deserts and plains. Its publications are part of the nonprofit effort the Club carries on as a public trust. There are more than 50 chapters coast to coast, in Canada, Hawaii, and Alaska.

For information about how you may participate in the Club's programs to enjoy and preserve wilderness and the quality of life, please address inquiries to: Sierra Club, 530 Bush Street, San Francisco, California 94108.

This calendar was printed in Italy by A. Mondadori, Verona, Italy. Distribution is by Charles Scribner's Sons, 597 Fifth Avenue, New York, New York 10017. Copyright © 1980 Sierra Club. JOHN RAUSTEIN

Habitat Sweet Habitat.

Animals need homes, too. Without wilderness—whether it be forests, deserts, mountain ranges or lakes—there can be no future for our wildlife.

The Sierra Club has been working for over 87 years to protect and preserve the American wilderness in its many priceless forms. These wilder-

ness areas provide the vital habitats which nourish our precious wildlife resources.

The Sierra Club needs your help. Give yourself or a friend a membership today, and join 180,000 other members in their efforts to preserve every sweet habitat they can.

DOCUMENTATION IMAGES: A941 IMAGE 3

The Sierra Club has a proud history of accomplishments in the wilderness. John Muir founded the Sierra Club in 1892 because he wanted others to share his love of the earth and all of nature. Today, the Club has grown to become the nation's strongest dedicated to conserving wilderness. Its horizons now extend to protecting all the environment around us, whether in the cities or in the wilderness.

The Sierra Club has a proud history of accomplishments, including a major role in the formation of the National Park Service and the Forest Service. In its 87 years, the Club has worked to protect wilderness, wildlife and the environment itself. As society's demands on our natural resources have increased, the scope of the Club's conservation efforts has grown to include issues such as energy conservation, air and water pollution, controls over toxic chemicals, siting of nuclear power plants and safe disposal of nuclear wastes.

Sierra Club programs are carried on nationally, as well as on many local levels through the efforts of active volunteers working through their chapters and groups. The Club promotes conservation values through its educational programs, such as publishing, outings, newsletters, special alerts, and conferences. When the time for public decision is at hand, we lobby in the legislature—national, state and local. When all else fails and our environment needs a skilled defender, we resort to litigation.

Join with us in our battle for a healthier environment. Every new member strengthens the Club's voice in the legislative debates over the future of our wilderness and environment. You will receive our bimonthly magazine, *Sierra*, your chapter newsletter, and be eligible for hundreds of outings in your area and around the world. Also, you will receive a 20% discount on all Club publications, including the renowned calendars and award-winning books.

Add your influence on behalf of all that is defenseless, irreplaceable and voiceless in our natural heritage. Give yourself, or a friend, a Sierra Club membership—and enjoy the satisfaction of knowing that you are helping to make the world a better, more livable place.

The Sierra Club
